Veeco Instruments Inc.

963

SUBJECT: Distribution of Generally Licensed Radioisotope Sources

Calendar Quarter Ending: September 30, 1996

As required by our Radioactive Materials License (New York State) No. (GL) 1414-0921, and by State of New York Industrial Code Rule 38, Table 3, item (b) (and by equivalent U.S.N.R.C. regulations, Title 10, Part 31, par. 31.5), we are submitting the accompanying names of customers in your area of jurisdiction to whom we shipped radioisotope sources and probes during the last calendar quarter. All of these sources are sold for use with the MICRODERM beta-backscatter thickness gauges.

In addition to the shipping date, source model number and serial number, the isotope contained in the source is indicated by element notation only. The specific isotope and the amount of it included are listed here.

<u>Element</u>	<u>Isotope</u>	<u>Maximum Amount, Microcuries</u>
Pm	Promethium-147	Less than 900
Tl	Thallium-204	Less than 100
Sr	Strontium-90, Yttrium-90	Less than 25

Very truly yours,

Justina Kompus
