SUBJECT: TASK ORDER NO. 135, ENTITLED, "WATERFORD SSEI" Under Contract No.
NRC-03-93-026

Dear Mr. Lofy:

In accordance with Section G.4, Task Order Procedures, of the subject contract, this letter definitizes the subject task order. The effort shall be performed in accordance with the enclosed Statement of Work and the Contractor's technical proposal dated November 18, 1997. Additionally, this letter confirms verbal authorization provided to Mr. Richard Lofy, on November 18, 1997, to begin work on Task Order No. 135.

Task Order No. 135 shall be in effect from November 18, 1997 through January 9, 1998 with a cost ceiling of \$33,779.39. The amount of \$32,800.60 represents the estimated reimbursable costs, the amount of \$93.28 represents the facilities capital cost of money, and the amount of \$885.52 represents the fixed fee.

Accounting data for Task Order No. 135 are as follows:

B&R No.:	8201511202B
Job Code:	J-2407-8
BOC:	252A
RFP No.:	NRC-03-93-026 dtd 10/30/97, REV 11/18/97
APPN No.:	31X0200.820
Oblig. Amt.:	\$33,779.39

The following individual is considered to be essential to the successful performance for work hereunder: Mr. Haywood S. Anderson. The Contractor agrees that such personnel shall not be removed from the effort under the task order without compliance with Contract Clause H.4, Key Personnel.

The issuance of this task order does not amend any terms or conditions of the subject contract.

STATEMENT OF WORK
Task Order 135 Revision 1

TITLE: Waterford Safety System Engineering Inspection (SSEI)

DOCKET NUMBER: 50-382 B&R NUMBER: 820-15-11-12-2B JOB CODE: J-2407

NRC PROJECT OFFICER: A. S. Masciantonio, NRR (301) 415-1290

TECHNICAL MONITOR: Linda Smith, R/V (817) 860-8137

PERFORMANCE PERIOD: November 18, 1997 - January 9, 1998

BACKGROUND

A Safety System Engineering Inspection (SSEI) will be conducted at the Waterford nuclear plant near New Orleans, LA. The SSEI will assess the operational performance capability of selected safety system(s) through an in-depth, multi-disciplinary review to verify that the system is capable of performing its intended safety function. The inspection will also verify completed actions for regulatory commitments that the licensee made in conjunction with the safety systems. Review of safety systems is to be performed in accordance with NRC Inspection Procedure 93809 for a Safety System Engineering Inspection (SSEI).

OBJECTIVE

The objective of this task order is to obtain expert technical assistance in the areas of mechanical design. The specialist is needed to assist the NRC inspection team in the performance of the SSEI. The mechanical specialist should primarily have a design background, such as from an architect-engineer firm with experience in system design requirements and calculation. The specialist should also be familiar with installation and surveillance testing of equipment along with cognizance of how site engineering and operations organizations function. The specialist should be thoroughly familiar with NRC regulations and inspection methodology. Also, the specialists should be familiar with the regulatory process, and should be able to develop a list of regulatory commitments from docketed licensee correspondence for the plant system(s) selected for review. The specialist will then be required to verify implementation of the licensee's commitments.

It shall be the responsibility of the contractor to assign technical staff, employees, and subcontractors, who have the required educational background, experience, or combination thereof, to meet both the technical and regulatory objectives of the work specified in this Statement Of Work (SOW). The NRC will rely on representation made by the contractor concerning the qualifications of the personnel proposed for assignment to this task order including assurance that all information contained in the technical and cost proposals, including resumes and conflict of interest disclosures, is accurate and truthful.

WORK REQUIREMENTS AND SCHEDULE

The work specified in this SOW falls within Section C.3 of the basic contract's SOW. The contractor shall provide the qualified specialist, and the necessary facilities, materials, and services to assist the NRC staff in preparing for, conducting, and documenting the inspection activities and findings. The Technical Monitor for this task is Linda Smith. The Technical Monitor may issue technical instructions from time to time during the duration of this task order. Technical instructions must be within the general statement of work stated in this task order and shall not constitute new assignments of work or changes of such nature as to justify an adjustment in cost or period of performance. The contractor shall refer to section G.1 of the basic contract for further information and guidance on any technical directions issued under this task order.

Any modifications to the scope of work, cost or period of performance of this task order must be issued by the Contracting Officer and will be coordinated with the NRR Project Officer. Specific tasks under this task order are:

<u>Task</u>	<u>Schedule Completion</u>
1. Develop a list of regulatory commitments for the selected plant system(s) based upon a review of docketed information. Prepare an inspection plan and obtain a thorough understanding of the selected system(s).	Inspection preparation will take place November 19 - 21, 1997, at the Region IV offices in Arlington, TX, and continue at the contractor's home office on November 24 and 25, 1997.
2. Perform the inspection.	On-site inspection is to take place on December 1 - 5 and December 15 - 19, 1997, at the Waterford site, with one week of intervening review, December 8 - 12, 1997, at the contractor's home offices.
3. Prepare the inspection report.	Documentation of inspection will take place during the period of December 29, 1997 - January 7, 1998, at the contractor's home offices. Final inspection report input is due January 7, 1998.

NOTE: Prior to the start of on-site preparation, the contractor's staff is required to be available to coordinate inspection aspects, such as travel logistics, with the Team Leader.

REPORT REQUIREMENTS

Technical Report

At the completion of Task 1, the contractor's specialist shall provide an inspection plan to the

NRC Team Leader. The format and scope of this input shall be as directed by the NRC Team Leader.

During Task 2, the contractor's specialist shall provide daily reports to the NRC Team Leader. The format and scope of this report shall be as directed by the NRC Team Leader.

At the completion of Task 2 (prior to the inspection team's exit meeting with the licensee), the contractor's specialist shall provide a draft inspection report input to the NRC Team Leader. The format and scope shall be as directed by the NRC Team Leader. Typically, this input will consist of a handwritten summary of the specialist's inspection findings.

At the completion of Task 3, the contractor shall deliver the final inspection report input (feeder report) to the NRC Project Officer (original and one copy) with one hard copy and one computer diskette version (WordPerfect 5.1 or other IBM PC compatible software acceptable to the NRC Team Leader) to the NRC Team Leader. The format and scope of the final report inputs shall be as directed by the NRC Team Leader.

A specialist's feeder report will serve as documentation of the specialist's inspection activities, effort, and findings, and will be used by the NRC Team Leader for the preparation of the NRC's inspection report. The form and scope of the final report input shall be as provided by the NRC Team Leader. As a minimum, each specialist's report input shall include the following:

- Identity of the individuals (name, company, and title) that provided information to the specialist during the inspection.
- For each area inspected, a description of the activities and general findings and conclusions reached regarding the adequacy of the area.
- For each area with a concern or findings, a discussion of the concerns or findings with technical bases.

NOTE: The contractor is not required to undertake any further efforts toward report finalization. For example, management review of the feeder report beyond its submittal to the NRC Team Leader and Project Manager is not needed.

Business Letter Report

The contractor shall provide monthly progress reports in accordance with the requirements of the basic contract.

MEETINGS AND TRAVEL

For estimating purposes, the following meetings and travel are anticipated:

One, one-person, 3-day trip to the Region IV offices in Arlington TX, to prepare for the inspection (November 19 - 21, 1997).

Two, one-person, 5-day trips to the plant site near New Orleans, LA to conduct the inspection (December 1 -5 and December 15 - 19, 1997).

The contractor's staff shall coordinate all travel arrangements in advance with the NRC Team Leader.

ESTIMATED LEVEL OF EFFORT

<u>Number</u>	<u>Discipline</u>	<u>Hours</u>
1	Mechanical Design Specialist	226

The estimated level of effort for each specialist consists of 46 hours for inspection preparation, 140 hours for on-site inspection and review, and 40 hours for inspection documentation.

NRC FURNISHED MATERIAL

Documents required to prepare for the inspection will be provided by the NRC Team Leader.

OTHER APPLICABLE INFORMATION

The work specified in this SOW is 100% licensee fee recoverable. The contractor shall provide fee recovery information in the monthly progress reports in accordance with the requirements of the basic contract.

The contractor's specialist assigned to this task order will have to be badged for unescorted access privilege at the plant site. The contractor shall provide all documentation required for badging (as identified by the NRC Team Leader) at the plant site. Questions concerning badging and the plant site access shall be addressed to the NRC Technical Monitor.
