Secretary of the Commission  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attn: Docketing and Service Branch

Dear Sir:

Because of interest in the degreed requirements for senior reactor operators, I would like to receive a copy of the May 27 NRC advance notice of a proposed rulemaking to require that each applicant for a senior reactor operator (SRO) license after January 1, 1991, have a baccalaureate degree in engineering or the physical sciences from an accredited institution. I am most interested in commenting on this proposed rulemaking prior to the July 29 deadline.

Please send this notice to me at the following address:

Dr. William G. Vernetson  
Room 202 NSC  
University of Florida  
Gainesville, Florida 32611

Thank you for your consideration of this request.

Sincerely,

William G. Vernetson  
Associate Engineer
