SUPPLEMENTAL INFORMATION TO SUPPORT CHANGE TO EMERGENCY PLAN -
ELIMINATION OF COMMITMENT TO INCORPORATE THE TECHNICAL SUPPORT
CENTER INTO THE PROTECTED AREA

Gentlemen:

By letter dated September 10, 1998 (Serial: BSEP 98-0151), Carolina Power & Light (CP&L) Company requested NRC approval of a proposed change to the Radiological Emergency Response Plan for the Brunswick Steam Electric Plant (BSEP), Unit Nos. 1 and 2. The requested change, currently being reviewed by the NRC, consisted of an exception to the Technical Support Center (TSC) location guidance in Supplement 1 to NUREG-0737, "Clarification of TMI Action Plan Requirements, Requirements for Emergency Response Capability." Specifically, the requested change would eliminate the current Radiological Emergency Response Plan requirement to incorporate the TSC, upon activation, into the protected area.

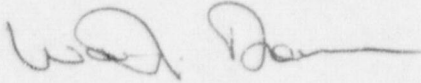

During recent reviews of CP&L's letter dated September 10, 1998, CP&L has identified the need for correction regarding the proposed markup of Figure 3.2-1, "Brunswick Emergency Organization." This proposed markup was provided to the NRC as Enclosure 2 to CP&L's letter dated September 10, 1998. Specifically, the proposed markup reflects deletion of the "Security Officer" position from the emergency response organization. Although the proposed change to eliminate the commitment to incorporate the TSC into the protected area upon activation of the TSC results in the deletion of some of the staffing requirements for security guards, the emergency response organization will continue to include a TSC Security Officer. The responsibility of the TSC Security Officer remains to establish and maintain access control to the TSC. In light of this correction, CP&L is withdrawing the proposed markup of Figure 3.2-1. There are no changes to Figure 3.2-1 resulting from the elimination of the commitment to incorporate the TSC into the protected area upon activation of the TSC.
