Dear People:

Re: Seabrook Nuclear

It is apparent we the people who must live in this area of potential trouble are having little or no input as to the safety of our lives.

The Public Service Company of New Hampshire who aborted this plant from day one are bound to produce electricity at any expense. Your last trial run up here, they lied about.

Town meetings are coming up with articles to discuss on this plant which from all signs are an operation in futility - Judge Rodden gave away our power to decide.

Please we beg you, do something - they shall never clear out this area - never.

Please
Howard Sarris
