

JUL 15 1986

Docket No. 50-289

MEMORANDUM FOR: Harry Kister, Chief
Projects Branch No. 1

FROM: Allen R. Blough, Chief
Reactor Projects
Section 1A

SUBJECT: TMI-1 STATUS REPORT FOR THE PERIOD JULY 3 - 11, 1986

Enclosed is the TMI-1 weekly status report from the NRC Resident Office at TMI-1 for the subject period. The NRC staff continued to monitor routine plant operations at full power.

TMI-1 status reports are intended to provide NRC management and the public with highlights from an NRC regulatory perspective of TMI-1 activities for the previous week. Subsequent inspection reports will address many of these topics in more detail.

ENCLOSURE

TMI-1 STATUS REPORT FOR THE PERIOD JULY 3 - 11, 1986

1. Plant Status

As of 8:00 a.m. on July 11, 1986, TMI-1 was operating at 100 percent power and at normal reactor coolant temperature (579° F) and pressure (2155 psig).

2. Facility Operations Summary

At the start of the period, the plant was operating at 100 percent power and continued to operate at 100 percent during the reporting period. No significant operational problems were identified during the report period.

3. Items of Special Interest

There were no items of special interest from a regulatory perspective.

4. NRC Staff Status During the Period

During this report period work week, the NRC staff on site consisted of the senior resident inspector and one resident inspector. They were assisted by a region-based inspector. The other two resident inspectors were on military/annual leave through most of this report period.

The NRC staff at TMI-1 was comprised of the following personnel during the period:

- W. Baunack, Project Engineer
- R. Conte, Senior Resident Inspector
- C. Hix, Secretary
- D. Johnson, Resident Inspector
