Gentlemen:

Subject: Systematic Assessment of Licensee Performance (Inspection No. 50-354/85-99)

On January 16, 1986, as documented in the enclosed report, the NRC Region I SALP Board evaluated activities associated with the Hope Creek Generating Station.

A meeting has been scheduled at the Hope Creek site on February 27, 1986, at 1:30 p.m., to discuss the SALP. This meeting is intended to provide a forum for candid discussion, including your plans to improve performance and any comments you have on the assessment. We would like you to be prepared to discuss at the meeting the possible root causes and future implications of problems related to electrical and I&C construction activities as discussed in Section IV B of the enclosed report. Also, following the SALP meeting we would like to discuss with you and your staff the status and results of the preoperational test program.

Finally, please respond to the assessment in writing within 20 days after the SALP discussion meeting. The SALP report (supplemented and modified as appropriate) and your response will then be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

  
Thomas E. Murley  
Regional Administrator
