

November 26, 1997

Mr. Leon J. Olivier  
Vice President - Nuclear  
Boston Edison Company  
Pilgrim Nuclear Power Station  
600 Rocky Hill Road  
Plymouth, Massachusetts 02360

SUBJECT: PILGRIM NUCLEAR POWER STATION SYSTEMATIC ASSESSMENT OF  
LICENSEE PERFORMANCE (SALP) REPORT NO. 50-293/97-99

Dear Mr. Olivier:

In preparation for the Systematic Assessment of Licensee Performance (SALP) management meeting held on November 13, 1997, we became aware of a problem in the operations section. When discussing procedure quality issues, we referenced a configuration control issue involving the inadvertent isolation of reactor vessel water level detectors. This configuration control issue actually involved a mispositioned keep fill system valve which provides a small continuous flow into the reactor vessel water level reference leg. Thank you for pointing out this error in the SALP report. We also determined that this error did not change the overall rating in the operations area.

Enclosed is a corrected copy of Page 2 to the SALP Report.

Sincerely,

Original Signed By:

James T. Wiggins, Director  
Division of Reactor Safety

Docket No. 50-293
