

JUL 16 1986

Docket No: 50-220

Niagara Mohawk Power Corporation
ATTN: Mr. C. V. Mangan
Senior Vice President
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

In order for the Region to fully support the Nine Mile Point emergency exercise scheduled for October 29, 1986, an adequate review of the exercise objectives and scenario is essential. The guidelines identified below will be used for the submittal and review of the objectives and scenario packages prior to the exercise. You will note that the schedule is similar to the least restrictive submittal schedule noted in FEMA Guidance Memorandum No. 17, Revision 1, for comparable milestones. Region I has found that licensees generally comply with these guidelines, however, we recognize the need to stress the importance of both completeness and timeliness.

The following schedule should be used for all exercises:

Days in Advance	Information to be Submitted
75 Days	Description and scope of exercise, and the objectives to be fulfilled should be received in the Region I office. The objectives should include specific objectives to demonstrate, where appropriate, the effectiveness of corrective actions taken in regard to problem areas which have been previously identified during NRC inspections, emergency exercises and drills and your internal evaluation process.
60 Days	NRC will provide comments in writing, based on our review of your submittal.
45 Days	Complete exercise scenario package with modified objectives, schedules, exercise rules, all controller, contingency and simulation information, all data, including plant data, radiation level and release rate data, and samples of the data to be presented should be received in the Region I office.

30 Days

NRC will provide comments in writing, based on our (and our contractor's) review of your submittal.

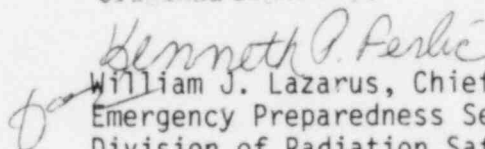

In order to protect the scenario from disclosure to participants, please send two copies to the Chief, Emergency Preparedness Section at the Letterhead address, marked, "EMERGENCY EXERCISE SCENARIO/OBJECTIVES." In addition, please send two copies directly to Battelle Pacific Northwest Laboratory, Technical Leader, Emergency Preparedness Group, Health Physics Department, 2125 George Washington Way, Richland, WA 99352, in order to expedite the review process. If you anticipate that the deadline will not be met, we recommend you use overnight mail.

The NRC emergency preparedness specialist responsible for evaluation of your exercise is Mr. Walter Thomas. Please identify the name, address and phone number of the individual on your staff with whom we should interface.

Your continued cooperation in this matter is greatly appreciated. If you have any concerns or questions, please contact Mr. Thomas at 215-337-5062.

Sincerely,

Original Signed By:

William J. Lazarus, Chief
Emergency Preparedness Section
Division of Radiation Safety
and Safeguards
