February 2, 1998

U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Document Control Desk

Subject: Quad Cities Station Units 1 and 2
Change of Commitment Date
NRC Docket Numbers 50-254 and 50-265

Reference: (a) E. S. Kraft (ComEd) letter SVP-98-005 to US NRC, dated
January 22, 1998
(b) NRC Inspection Report Numbers 50-254/97014 and
50-265/97014

The purpose of this letter is to inform you of the change of a committed due date in the response to the Notice of Violation contained in the submitted reference.

In the station's response, the station made the following commitment:

Engineering will review all test procedures for similar instances of Test Director recorded Acceptance Criteria. Procedures identified by this review will receive an additional NTS tracking number to require a procedure revision to include an Independent Verification of the Acceptance Criteria. (NTS iter: 254-100-97-01404.05, due February 16, 1998).

The station is changing the due date of this item to September 18, 1998. Due to the shutdown of both units, the Post Fire Safe Shutdown Improvement Program, the A/E Inspection Support, the prior to startup activities for both units, as well as other Engineering priorities, this commitment will not be completed by its original due date. This change will allow the station to ensure a complete and conscientious product from this review.
