

ILLINOIS POWER COMPANY

CLINTON POWER STATION, P.O. BOX 678, CLINTON, ILLINOIS 61727

August 21, 1986

Docket No. 50-461

Director of Nuclear Reactor Regulation
Attention: Dr. W. R. Butler, Director
BWR Project Directorate No. 4
Division of BWR Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Clinton Power Station
Final Safety Analysis Report
(FSAR) Section 13.2 Training

Dear Dr. Butler:

Illinois Power is revising its position on accelerated requalification for licensed operators. FSAR Section 13.2.2.1.5 "Accelerated Retraining" will be revised to include the following condition for placing a licensed operator in the accelerated retraining program:

"Not meeting the NRC passing criteria for an annual exam. In addition, the licensee shall be removed from all licensed duties until successful completion of the accelerated retraining program. Successful completion shall require a reexamination in each unsatisfactory category or a retake of the entire examination as determined by the Director - Nuclear Training."

This change is expected to resolve NRC Staff concerns on this issue. The FSAR will be revised in a future amendment to reflect this change.

Please contact me if you have any questions on this matter.

Sincerely yours,

A handwritten signature in cursive script that reads 'F. A. Spangenberg'.
