Docket No. 50-461

Director of Nuclear Reactor Regulation
Attention: Dr. W. R. Butler, Director
BWR Project Directorate No. 4
Division of BWR Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Clinton Power Station
Quality Assurance Organization

Dear Dr. Butler:

In Clinton Power Station (CPS) Final Safety Analysis Report (FSAR) Amendment 38, organizational changes were made within Section 17.2 as a result of Revision 16 to the Illinois Power Operational Quality Assurance (QA) Manual. Among the changes made were the deletion of the Director - Construction and Procurement QA, Supervisor - Construction QA and the QA Administrative Section.

Although the FSAR text was updated, the corresponding figure which shows the QA organizational chart, FSAR Figure 17.2-2, was not updated in Amendment 38. This figure will be updated in the next FSAR Amendment to correspond to Figure 1-3 of the Operational QA Manual (attached).

If you have any questions on this matter, please contact us.

Sincerely yours,

F. A. Spangenberg
