Dear Mr. Starostecki:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
IE Inspection Report 50-219/86-06

Your letter of July 24, 1986 evaluated GPU Nuclear's response to Notice of Violation B(2) contained in IE Inspection Report 50-219/86-06 and concluded that the citation was valid.

Upon further review, GPU Nuclear concurs with the violation.

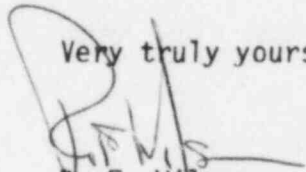

In order to reinforce compliance with the project review procedure, a memorandum will be issued to appropriate personnel stressing the requirement to ensure the independence of the Responsible Technical Reviewer. Full compliance will be achieved by September 2, 1986.

A response due date extension from August 13 to August 20, 1986 was granted on August 13 by A. R. Blough, Region I, via telephone. The extension was requested due to an eight day delay in receipt of your letter and the time necessary to review our position.
