Subject: Seabrook Station Solid Radwaste Handling System; Mobile
Waste Services

Dear Sir:

In References (b) and (c) we indicated that radioactive waste may be processed using a mobile service at Seabrook Station. We have since decided to establish a mobile services agreement with NUS Process Service Corporation (NUSPSC) and are providing, to the Staff, the following information regarding this mobile services contract and contractor.

NUSPSC has already submitted reports to the NRC regarding its mobile service which we are incorporating by reference for application at Seabrook Station. The documents submitted are:

- o NUSPSC Radioactive Solidification System Topical Report - PS-53-0378, Rev. 0. This report has been reviewed and approved by the NRC, reference SER PS-53-0378, Rev. 0.
- o NUSPSC Process Control Program (PCP) - submitted as Topical Report TR-002 to the Staff.

Boo
1/0

The above documents provide a full description of the solidification process and demonstrates compliance with the applicable requirements of 10CFR61. It can also be stated that the Seabrook design totally conforms with the NUSPSC PCP.

We trust that the enclosed is acceptable and request that this be reflected in the next supplement to Seabrook's SER. However, if you should have any further questions/clarifications regarding this matter please contact Dr. J. M. Kwasnik at (603) 474-9574, extension 4053.

Very truly yours,

John DeVincentis
Director of Engineering
