Mr. A. B. Davis, Chief
Fuel Facility & Materials Safety Branch
Nuclear Regulatory Commission, Region III
799 Roosevelt Road
Glen Ellyn, Illinois

Ref: your letter dated 10-27-78, Infractions and
Deficiencies.

Dear Sir:

In response to your letter I submit the following explanations
and the remedies that have been done.

Infraction # 1. A sign posted at the storage pit area reads:
STORAGE PIT IS TO BE LOCKED AT ALL TIMES.
OPEN ONLY DURING SOURCE TRANSFER.

NO EXCEPTIONS

Policing of this practice by the Health and Safety
officer is to be more stringent.

Infraction # 2. This error in the amendment has been pointed out by
correspondence with the licensing bureau. Correspondence
was written on Sept. 18, 1978 by suggestion
of Mr. P. Jerman. Return correspondence received
on Nov. 10, 1978 suggests that the error be corrected
on our current renewal application.

Deficiency # 3 & #4. As explained to Mr. Jerman, two new replacement
Units were on order and to be delivered to us in
October. Those units are in our possession now with
the new source containers. Placarding of the containers
and the trucks are in compliance with 10CFR 20.203
(F) (1) & (2), and D.O.T. 49CFR 170-189 ..

Deficiency # 5. Form AEC-3 has been posted since Nov. 1974 with the
following notice typed in the upper right hand area:

NOTICE

This is to advise all employees and all other persons
concerned, that Part 19, Part 20, the NRC license and
any related procedures are available for anyone to
examine. Send requests to:

Wm. L. Musselman
433 South Grant Street
Wooster, Ohio 44691

Although this was posted prior to Mr. Jermans visit
it was very inconspicuous due to some previous shop
re-arranging. It is now posted at three different areas.

If any further information or explanations are needed, please
keep me informed as we wish to comply with the regulations and your
requests.

Very truly yours,

Wm. L. Musselman

Wm. L. Musselman, Pres.
