Gentlemen:

This refers to the routine safety inspection conducted by Mr. S. G. DuPont of
this office on June 2 through July 9, 1986, of activities at Clinton Power
Station authorized by NRC Construction Permit No. CPPR-137 and to the discussion
of our findings with Mr. J. W. Wilson and others of your staff at the conclusion
of the inspection.

The enclosed copy of our inspection report identifies areas examined during
the inspection. Within these areas, the inspection consisted of a selective
examination of procedures and representative records, observations, and
interviews with personnel.

During this inspection, certain of your activities appeared to be in violation
of NRC requirements, as described in the enclosed Notice. The inspection
showed that action had been taken to correct the identified violations and
to prevent recurrence. Our understanding of your corrective actions is
described in Paragraph 7 of the enclosed inspection report. Consequently,
no replies to the violations are required, and we have no further questions
regarding this matter at this time.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of
this letter and the enclosed inspection report will be placed in the NRC Public
