

AUG 01 1986

Docket Nos. 50-424
and 50-425
Ms. Kathy W. Brinson
Route 2, Box 77
Sylvania, Georgia 30467

Dear Ms. Brinson:

The Department of Energy has forwarded your letter of July 3, 1986, to us for response. We appreciate your interest and the opportunity to respond to your question regarding the startup of Vogtle.

As you may know, the Vogtle units are pressurized water reactors each rated to provide approximately 1150 MWe. The fuel load of Unit 1 is presently estimated for December 15, 1986. Following pre-operational testing the unit would be ready for commercial operation about 6 months after loading fuel. The fuel load of the second Vogtle unit is scheduled for March 1988.

If you are interested in more specific information regarding Vogtle, you may wish to visit the Local Public Document Room (LPDR) for Vogtle at the Burke County Public Library on Fourth Street in Waynesboro, Georgia. The LPDR for Vogtle contains the Final Safety Analysis Report prepared by Georgia Power Company, the staff's evaluation of Vogtle environmental and safety issues discussed in the Final Environmental Statement and the Safety Evaluation Report, respectively, and all other correspondence related to the licensing of the Vogtle units.

If we can be of further assistance to you, please let us know.

Sincerely,

Original signed by:
Thomas M. Novak

Thomas M. Novak, Acting Director
Division of PWR Licensing-A

I would like any information
on the Savannah River
Plant and it's lack of
NRC regulations and it's
lack of containment domes.
Also, I would like to
know more about the start-
up of Plant Vogtle in
Waynesboro, GA. These projects
are both close in proximity to
my home. I have some very
serious questions about them
both. Thanks,

Kathy W. Brinson
