Mr. Oliver D. Kingsley
President, Nuclear Generation Group
Commonwealth Edison Company
ATTN: Regulatory Services
Executive Towers West III
1400 Opus Place, Suite 500
Downers Grove, IL 60515

SUBJECT: NRC ROUTINE PHYSICAL SECURITY INSPECTION REPORT
50-456/99004(DRS); 50-457/99004(DRS)

Dear Mr. Kingsley:

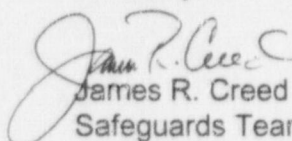

On March 11, 1999, the NRC completed an inspection at your Braidwood Generating Station, Units 1 and 2. The enclosed report presents the results of that inspection.

The inspection was an examination of activities conducted under your license as they relate to implementation of your NRC-approved physical security plan and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Security force performance was considered a strength. Although the quantity of self-assessments has decreased, the quality of the self-assessments reviewed were very good. An Inspection Followup Item was identified pertaining to the recent turnover rate for the security organization.

We will gladly address any questions you have concerning this inspection.

Sincerely,

James R. Creed
Safeguards Team Leader
