Wolf Creek Nuclear Operating Corporation  
ATTN: Bart D. Withers  
President and Chief Executive Officer  
P.O. Box 411  
Burlington, Kansas 66839

Gentlemen:

This refers to the inspection conducted by Messrs. L. E. Ellershaw, L. D. Gilbert, and R. G. Taylor of this office during the period September 26-30, 1988, of activities authorized by NRC Operating License NPF-42 for the Wolf Creek Generating Station, and to discussion of our findings with you and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included your inservice inspection program and procedures; welding and nondestructive examination procedures; the program for the control of design changes and modifications; and the program for control of procurement. These activities were inspected with respect to their relationship to the plant refueling outage scheduled to begin in early October 1988.

Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,  
Original Signed By  
*A. B. Beach*  
L. J. Callan, Director  
Division of Reactor Projects
