

JUN 28 1988

Annapolis Hospital  
ATTN: Wade C. Adams  
Administrator  
33155 Annapolis Avenue  
Wayne, MI 48184

Gentlemen:

Enclosed is Amendment No. 18 to your NRC License No. 21-11457-02 in accordance with your request.

Please note that Neelam B. Kumar, M.D. has not been given authorization for the use of generators or material from 10 CFR 35.300. In order to obtain authorization for the use of generators, Dr. Kumar will need to submit documentation of personal participation in the elution of 5 generators. In addition, authorization for the use of material in Section 35.300 requires documentation illustrating personal involvement in the treatment of hyperthyroidism in 10 individuals and the treatment of thyroid carcinoma in 3 individuals (see 35.932 and 35.934).

Your license has been rewritten to conform with the language of the revised 10 CFR, Part 35 which became effective April 12, 1987. The material you have been previously authorized for remains the same. Section 35.200 includes Xenon-133 and 35.500 includes sealed sources used for the analysis of bone mineral content in humans.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By  
Kevin G. Null
