Re: Control No. 05005

Gentlemen,

Following is the information you requested in your letter of July 31, 1981:

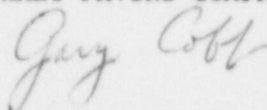

1. 4832 Wayview Road
North Canton, Ohio 44720
2. The gauge will be stored in the bathroom when not in use.
 - a. The address is the same as listed above.
 - b. This bathroom will be used for storage of the gauge only.
 - c. Yes it will be locked at all times when not in use.
 - d. There is a window in the bathroom that is 4" x 12" that is lockable by latch from the inside.
 - e. The only time anyone is in the trailer is to use the phone which is at the end of the trailer.

The bathroom inside the trailer is the designated storage area. The bathroom has hasp lock on the door and on the other two doors of entry there is a hasp lock on the inside on one and a dead bolt lock on the other one.

3. We do not plan to service our gauge. The gauge would be serviced by Troxler or whomever we would purchase the gauge.

Very truly yours,

THOMAS ASPHALT PAVING COMPANY, INC.
