Dear Sirs:

Enclosed is a check for \$120.00 made out to the U.S. Nuclear Regulatory Commission to amend the current NRC license #22-01025-01 for Mount Sinai Hospital, Minneapolis, MN.

Please amend the license as follows:

1. All wipe test samples will be counted with a thin window GM survey meter. This includes wipe test samples for sealed sources and area survey wipe samples. The GM thin window detector has a background rate of about 50 cpm. A sample will be considered high or contaminated if the count rate from the sample is greater than 2x background.
2. It is desired that the Linearity Test for a Dose Calibrator may be performed using a Calicheck or equivalent type of Linearity test system. The manufacturer's instructions for use will be followed.

If you have questions concerning this amendment, please contact Dr. David Swanson, M.D., Nuclear Medicine, phone (612) 872-5380.

Sincerely,

Lyndell Kewley
Administrative Director of Radiology
