South Texas Project  
Unit 2  
Docket No. STN 50-499  
PSI Examination Plan  
for Steam Generator Tubes (Unit 2)

The enclosed Preservice Inspection (PSI) Examination Plan for STP Unit 2 (5 copies) is HL&P's initial plan for examination of Steam Generator tubing in accordance with 10CFR50.55a and ASME Section XI. This plan may be revised during the performance of the PSI in response to the as-built conditions determined from observations of the tubing prior to or during the examinations. A master copy of the Unit 2 PSI Examination plan containing all revisions will be maintained on-site by our examination agency, Conam Inspection. The Master Examination Plan will be available on-site for NRC inspection whenever this is desirable. The PSI of Steam Generator tubes is expected to begin in April 1987.

If you should have any questions on this matter, please contact Mr. J. S. Phelps at (713) 993-1367.

  
M. R. Wisenburg  
Deputy Project Manager
