Docket No. 70-1113
License No. SNM-1097

General Electric Company
ATTN: Mr. Eugene A. Lees, General Manager
Nuclear Fuel and Components
Manufacturing
P. O. Box 780
Wilmington, NC 28402

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NO. 70-1113/88-13)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by J. W. Bates and others on September 26-30, 1988. The inspection included a review of activities authorized for your Wilmington facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. Since adequate corrective action was taken during the inspection and compliance with NRC requirements has been achieved, no response to the enclosed Notice of Violation is necessary.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure; therefore, the enclosures to this letter, with the exception of the report cover page which presents a nonexempt summary, will not be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

William E. Cline, Chief
Nuclear Materials Safety
and Safeguards Branch
Division of Radiation Safety
and Safeguards

General Electric Company
