RECEIVED

27 OCT 1987

Dear Dr. Glenn:

Following affirmative comments by Ms. Jenny Johansen on proposals submitted to you on September 30, 1987, by Carol A. Sever, Regulatory Compliance Administrator of Miles Pharmaceuticals, we are submitting herewith in behalf of the Miles Research Center a new application for a Byproduct Material Licence. Included is a check for \$700.00, which is the new application fee for category 3M.

This License will cover research activities involving radioactivity in a new facility of Miles, Inc., West Haven, CT, known as the Miles Research Center. The facility will house Molecular Diagnostics, Inc. and Molecular Therapeutics, Inc., both of which currently occupy space in the main plant of the Pharmaceuticals Division of Miles Inc., as well as a new group, the Autoimmune Diseases Institute.

At present, MDInc. operates under NRC Lic. No. 06-20589-01, and MTInc. operates under NRC Lic. No. 06-20972-01. These licenses would be terminated upon issuance of the license covering the Miles Research Center.

Thank you for your attention to this license application. The move of MDInc. and MTInc. from the Miles Pharmaceuticals plant to the Miles Research Center will take place in December, 1987, and we hope the application process can be completed by that time.

Sincerely,

Mithat Mardin

Mithat Mardin
Manager, Research Services
Miles Research Center
