Mr. John B. Martin
 Regional Administrator
 U.S. Nuclear Regulatory Commission
 Region V
 1450 Maria Lane, Suite 210
 Walnut Creek, CA 94596

Subject: Docket 70-734: SNM-696; Changes to Safeguards Contingency Plan
 (5 copies)

Dear Mr. Martin:

Recent retirements of certain GA Technologies Inc. (GA) personnel have lead to some changes to our organizational structure. These changes have been discussed at length with NRC staff, Region V and Headquarters. In particular they address the retirements of R. Wolf (Corporate Secretary) and F. Bold (Health Physics & Safety Services).

With the retirement of F. Bold, Emergency Services now reports to the Manager of Security, and Health Physics reports to the Manager of Licensing and Nuclear Compliance. Those compliance functions that had reported to the corporation's secretary now report to the Director of Human Resources through Licensing and Nuclear Compliance. Licensing and Nuclear Compliance includes those functions that had previously comprised "Licensing and Nuclear Material Control" plus Nuclear Safety and Health Physics. These changes obviate the "dotted line" reporting relationship that had existed between Security (and Health Physics) and the corporation's secretary. All functions responsible for compliance are now consolidated under one person, namely, the Director of Human Resources who, as before, reports directly to the corporation's president.

The Security organization and personnel remain unchanged with the exception that, as mentioned above, Emergency Services now reports to the Manager of Security.

As a result of the above changes, which became effective on March 24, 1986, various of our plans required revision. Accordingly, we are hereby submitting such changes to our Safeguards Contingency Plan made pursuant to 10 CFR 70.32(g). The plan changes have been identified by a ruled margin. Please revise your copies of this plan.

Under separate cover, we are also submitting revised pages to the following of our plans: (1) Category I Shutdown Facility Physical Protection Plan, Revised 1 May 1986; (2) Fixed Site and Transportation Plan for the Physical Protection of Special Nuclear Material of Moderate and Low Strategic Significance, Revised 1 May 1986; (3) Security Officer Training and Qualification Plan, Revised 1 May 1986; and (4) Fundamental Nuclear Material Control Plan, Revised May 1986.

If you have any questions regarding the above, please contact me at (619) 455-2823.

Very truly yours,

Keith E. Asmussen
