Export/Import and International Safeguards
Office of International Programs
Washington D.C. 20555

Dear Ms Wright,

I attach for your consideration a copy of a telex message we received recently from the Compagnie pour L'Etude et la Realisation de Combustibles Atomiques (CERCA), confirming that Edlow International has been requested to perform transportation services from Oak Ridge to France no later than the week of June 26, 1986.

The export license covering the movement of this material is currently held by Transnuclear Inc. (XSNM02229). We have been informed by our agent in France that CERCA has instructed Transnuclear to request the NRC to include Edlow International as a licensee permitted to ship material under this license.

I would appreciate any assistance you are able to offer in this matter.

Sincerely,

A.M. Fisk
Manager, International Affairs.
