Mr. Harold R. Denton  
U.S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, DC. 20555

Subject: Braidwood Station Units 1 & 2  
Proof and Review Tech Spec Changes  
NRC Docket 50-456 and 50-457

Dear Mr. Denton:

Enclosed is an attachment which includes information which is to be included in the Final Draft of the Braidwood Technical Specifications.

Attachment 1 is a mark-up of Section 3/4, "Instrumentation," to the Braidwood Proof and Review Tech Specs. Changes have been made to Tables 3.3-11a and b, "Fire Detection Instruments" (pages 3/4 3-58 through 3-63) and Tables 3.7-5a and b, "Fire Hose Stations" (pages 3/4 7-36 through 7-44). These changes reflect Braidwood as-built conditions as of August 14, 1986. Please incorporate these changes in the Final Draft of the Braidwood Technical Specifications.

Please direct any questions you may have regarding this matter to this office.

One signed original and fifteen copies of this letter and its related attachment are being provided for your review.

Very truly yours,

I. M. Johnson  
Nuclear Licensing Administrator

TABLE NOTATIONS

\*A single detector in a zone marked "Detection" will alarm in the Main Control Room. A single detector in a zone marked "Suppression" will initiate suppression and alarm in the Main Control Room.

\*\*These are Containment Ventilation temperature switches. Upon receipt of a Hi-Hi temperature, suppression must be manually initiated. These switches are not 720 supervised.

\*\*\*The fire detection instruments located within the containment are not required to be OPERABLE during the performance of Type A containment leakage rate tests.
