

Docket No. 030-07022
Control No. 105620

License No. 29-13613-02

Radiation Technology, Incorporated
ATTN: Austin Smith, M.D.
Chairman of the Board
108 Lake Denmark Road
Rockaway, New Jersey 07866

Gentlemen:

Please find enclosed the renewal of NRC License No. 29-13613-02 for a probationary period of six months and the associated Safety Evaluation Report.

Please review the enclosed license carefully and be sure that you understand all conditions. Please note the following:

- ~~The expiration date is February 28, 1987. You must file an application for renewal thirty days prior to the expiration date. We will perform frequent inspections and evaluate your performance during this probationary six month period and determine whether the license will again be renewed.~~
- Conditions 9.B. and 9.C. limit the authorized use of certain specified sealed sources to storage only. We will consider authorizing the use of these items when you have submitted a license amendment request that includes a more complete description of the training to be provided to users of these items.
- Condition 11 names those individuals who may use, or supervise the use of, licensed material and specifically excludes certain individuals from licensed activities. You must file a request to amend your license if you wish to add additional users. We will not consider relaxation of restrictions on named individuals for the period of this probationary license. Subsequently, you must obtain the approval of the Regional Administrator, Region I, before promoting any of these individuals to management positions.
- Condition 20 requires monthly audits of your licensed program and specifies those individuals who may perform these audits. You must file a request to amend your license if you wish to change or add auditors.
- Condition 21 includes, among other documents, your July 18, 1986 Answer to Immediately Effective Order Suspending Licenses (with enclosures). This Condition requires that you comply with all procedures enclosed with the July 18, 1986 document.
