Re: Amendment to materials license # 21-04177-01

Attention: Evelyn Matson

Dear Ms. Matson,

Mercy-Memorial Medical Center, Inc.- Mercy Division would like to amend its present NRC license to reflect the following changes:

- Item 6b: Radioactive Materials
Add: I-125 as a 300 mCi. sealed source for use with bone mineral analysis equipment.
- Item 8: Training and experience
Add: Dr. Lim for use of the bone mineral analysis unit on site (see license #21-12275-02)
- Item 9: Instrumentation
Add: Lunar Radiation Corporation Model SP-2 rectilinear (I-125) forearm scanner (bone mineral analysis)

We wish to receive the I-125 bone mineral analysis equipment and source at our facility from Borgess Medical Center (materials license #21-12275-02) for use on dialysis patients. The package receipt procedures would be the same as previously listed in our materials license. We request an exemption from 10 CFR 35.14 b(3) to enable us to receive the source from Borgess Medical Center.

Our check for the \$120.00 amendment processing fee is enclosed. Please contact Mr. Tony Mason (Medical Radiation Physicist) at (313) 662-3197 with questions concerning information listed above.

Sincerely,

Richard G. Muir

Richard Muir
Senior Vice President
