

PEACH BOTTOM ATOMIC POWER STATION
Unit Nos. 2 and 3
Docket Nos. 50-277 & 50-278

SEMI-ANNUAL EFFLUENT RELEASES REPORT

NO. 19

REVISION NO. 2

JANUARY 1, 1985 THROUGH JUNE 30, 1985

Submitted to
The United States Nuclear Regulatory Commission
Pursuant to
Facility Operating Licenses DPR-44 & DPR-56

I.

INTRODUCTION

In accordance with the Unique Reporting Requirements of Technical Specification 6.9.2.h(2) applicable during the reporting period, this report summarizes the Effluent Release Data for Peach Bottom Atomic Power Station Units 2 and 3 for the period January 1, 1985 through June 30, 1985. The notations P and N are used to denote positive and negative exponents to the base 10.

The release of radioactive materials during the reporting period was within the Technical Specification limits. There were no changes to the Off-site Dose Calculation Manual (ODCM) during the reporting period. During the report preparation period, there was an unplanned release which will be discussed in the next Semi-Annual Effluent Release Report.

Semi-Annual Effluent Release Report No. 19, Revision 0, submitted August 30, 1985, has been revised as follows:

The "INTRODUCTION" on page i of the Semi-Annual Effluent Release Report No. 19, Revision 0, was revised to correct an error in the Technical Specification designation for the requirements under which the Semi-Annual Effluent Release Report is submitted. The Technical Specification designation was changed from 6.9.3 to 6.9.2.h(2) as a result of the issuance of Amendment Nos. 102 and 104 for Peach Bottom Atomic Power Station Unit Nos. 2 and 3, respectively.

Table E on page 7 of the Semi-Annual Effluent Release Report No. 19, Revision 0, was revised to correct an error in the total activity (in curies) for the solid radioactive waste shipments for the month of May, 1985. The correct activity for that month is 8.75 P1 instead of 8.75 P2. This correction also resulted in a correction to the total activity for the entire six month period. Therefore, the "TOTAL" activity was changed from 1.19 P4 to 1.11 P4.

An attachment (2 pages) has been incorporated into the report to provide information required by Technical Specification 6.9.2.h(2) for each class of solid radioactive waste shipped offsite during the report period.

I. INTRODUCTION (Continued)

Semi-Annual Release Report No. 19, Revision 1, submitted October 8, 1985 has been revised to reflect changes in Table B, Isotopic Analysis of Liquid Radioactive Releases (two pages). The changes incorporated into this revision included:

1. Activity information for Phosphorus-32 and Iron-55, which were omitted from previous submittals.
2. The correction of Activity Totals as a result of including the activities for Phosphorus-32 and Iron-55.
3. The correction of Body Dose, Bone Dose, Total Body Dose, and Total Bone Dose information as previously reported.
