Telecon with Allegor A-36:

1/27/85 (1200 EST)

I called allegor A-36 to arrange a feedback interview on a few remaining items in the mechanical area not yet covered with the individual during an interview on 11/15/84. Allegor indicated he did not understand why NRC continues to contact him even though he has no concerns. I indicated that our intent was to inform him of TRT findings regarding his concerns but that we did not want to pursue this any more against his wishes. After some further discussion it was concluded by both parties that further contact between both parties was no longer necessary.
