Containment Systems Research Branch  
Office of Nuclear Regulatory Research  
Mail Stop 1130-SS  
Washington, D. C. 20555

Dear John:

This letter reconfirms the invitation, recently extended during a phone conversation, for you to participate in a discussion about vapor explosions to be held at Argonne National Laboratory on December 3. Actual technical discussions should start around 11:00 AM but if you can get there a little earlier -- any time after 10:30 -- we can share a roll and a cup of coffee before we start. The meeting will be held in Conference Room C234 in Building 208. Enclosed is a map of Argonne. Please note (as shown on the map) that the Lab recently opened a new main gate and reception center so it is necessary to come in Northgate Road rather than the old route of Cass Avenue south. You must stop at the visitor's reception center before clearing through the guard post; your name will be on a list of approved visitors.

I look forward to seeing you in just over three weeks. If you have any questions in the interim, my office phone is (312) 972-3091 and my lab number is (312) 972-5947.

Yours truly,

Richard P. Anderson  
Reactor Analysis and Safety Division
