Re: Application for License to export Enriched UF6
for Tomari 1, Region 13 and Tomari 2, Region 11

Dear Ms. Wright:

Please find enclosed our check for USDLS2,800.00 and application for a license to export enriched UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Tomari 1, Region 13 and Tomari 2, Region 11, owned by Hokkaido Electric Power Company Inc. in Japan.

The contract for the uranium enriching services with the U.S. Enrichment Corporation (USEC) is EC-SCO1-98UE08239.

Please note that the feed material is supplied by Australia and the U.S.A.

The relevant enriched UF6 will be delivered from USEC's Portsmouth Enrichment Plant in Piketon, Ohio. After being exported to Japan, it will be converted to UO2 powder, palletized and fabricated into fuel assemblies by Mitsubishi Nuclear Fuel Co., Ltd.

As to the validity of the export license, we wish to have a two-year period from the date of issuance.

With regard to sampling, we request that Three (3) P-10 tube samples be taken from each parent cylinder. These samples should be delivered to Mitsubishi International Corporation c/o Teledyne Brown Engineering Environmental services for independent analysis. We also request that JAI Corporation witness the weighing, sampling and loading operation.
