**Subject:** FedEx RAM Package

John,

This will confirm my telephone conversations with you today, April 26, 1999, at 8:39a CT and 11:37a CT. The AEA Technologies Model 855 container with 866 Ci of Ir-192 was located early this morning at the FedEx STN (Stansted) ramp, which is the airport that FedEx uses to serve the London area. The container was in original condition and it is being transported to the consignee at TLC (Toluca, Mexico) at the request of the shipper, AEA Technologies.

Roy
