This correction is warranted because in conversations with the NRC after the completed license was received, it was determined that the NRC has no provision to list on a license of this type (any equivalent source). Therefore, the license as it is currently written would not license us for any GD Series Source. We would appreciate immediate action on the corrected license because the GD Series Source which we wish to purchase is not presently covered on the existing license.

Sincerely,

Victor Lee, M.D.
