**Subject: Beaver Valley Power Station, Unit No. 1 and No. 2**  
**BV-1 Docket No. 50-334, License No. DPR-66**  
**BV-2 Docket No. 50-412, License No. NPF-73**  
**License Amendment Request Nos. 271 and 147**

Pursuant to 10 CFR 50.90, Duquesne Light Company requests an amendment to the above licenses in the form of changes to the technical specifications. The proposed amendment revises the frequency notation for the manual functions specified in the Engineered Safety Features Actuation System technical specification to more clearly denote the appropriate refueling frequency for testing. In addition, the proposed change makes the Beaver Valley Power Station technical specifications more consistent with the standard technical specifications for Westinghouse plants.

Proposed technical specification changes for Unit No. 1 and Unit No. 2 are presented in Attachments A-1 and A-2, respectively. The safety analysis (including the no significant hazards evaluation) is presented in Attachment B.

These changes have been reviewed by the Beaver Valley review committees. The changes were determined to be safe and do not involve a significant hazard consideration as defined in 10 CFR 50.92 based on the attached safety analysis. An implementation period of up to 60 days is requested following the effective date of this amendment.

Sincerely,

Sushil C. Jain
