

UNITED STATES NUCLEAR REGULATORY COMMISSION
SOUTHERN CALIFORNIA EDISON COMPANY
DOCKET NOS. 50-361 AND 50-362
NOTICE OF WITHDRAWAL OF APPLICATION FOR AMENDMENTS
TO FACILITY OPERATING LICENSES

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Southern California Edison Company, et al. (the licensee) to withdraw its March 1, 1993, application for proposed amendments to Facility Operating License Nos. NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, located in San Diego County, California.

The March 1, 1993, proposed change would have modified Technical Specification 3.3.3.2 to redefine an operable incore detector string.

The Commission had previously issued a Notice of Consideration of Issuance of Amendments published in the FEDERAL REGISTER on July 7, 1993 (58 FR 36446). However, by letter dated April 27, 1995, the licensee withdrew the amendments request indicating that it had been superseded by the technical specification improvement program application dated December 30, 1993.

For further details with respect to this action, see the application for amendments dated March 1, 1993, and the licensee's letter dated April 27, 1995, which withdrew the application for license amendments. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington,

DC, and at the local public document room located at the Main Library, University of California,
P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 15th day of March 1999.

FOR THE NUCLEAR REGULATORY COMMISSION

A handwritten signature in cursive script, reading "James W. Clifford".

James W. Clifford, Senior Project Manager
Project Directorate IV-2
Division of Licensing Project Management
