Re: Renewal of License No. 25-17317-01

Gentlemen:

We have received notice that the above numbered radioactive material license will expire on July 31, 1987. We have reviewed our current license, and because of changes to satisfy NRC regulations and update our procedures, we have prepared a complete resubmittal. All documents listed in Condition 18 of our license can be deleted, as they are no longer relevant or have been incorporated into this new submittal.

We submit herewith in duplicate a completed NRC Form 313 with supplemental pages which reference our current license as to radioactive materials and purposes for their use, as there is no change. We also submit a completely revised Operating and Emergency Procedures Manual in which we have tried to incorporate, at least by reference, the new regulations outlined in 10 CFR Part 39. Also enclosed is our check in the amount of \$700.00 to cover the license fee.

You will note that although the Billings facility was deleted from our license by amendment, our main offices are still located there. Street address is 3203 Westfield Drive, Billings, Montana 59106. This is where my office is located and the master radiation files are kept here. The two field stations have appropriate records for their operations.

Please renew our license in accordance with these enclosures. Our operations have not changed from the time of the original application. We wish to continue to operate under our current license pending receipt of the renewal license and will continue to operate in accordance with documents that reflect our current program, license conditions and applicable NRC regulations. If you need any additional information or clarification, please contact me at (406) 268-8555 or you may contact our consultant, Keith Moon of Support Consultants and Associates, Inc. (817) 893-2088, as he has assisted us in preparing this renewal submittal and is authorized to represent us in this matter.

Sincerely,

Martin O'Neill
Martin O'Neill, President
