Re: By-Product Materials License No. 45-02429-01
and 20 amendments.

Dear Sirs:

We request an amendment to the aforementioned license to increase our by-product storage limitation from 800 millicuries to 1600 millicuries on a temporary basis not to exceed six months. As always appropriate surveys would be carried out to insure that radiation levels in and around the storage area are within the prescribed limits. This change would allow us to cope with the volume of sources necessary to accommodate a timely change out of the SIF-W513 style sources as reported to you in a letter of April 25, 1988, plus additional sources due to a recent sale of new gauges.

In accordance with 10CFR170.31-3B, 3N, and 3P please find enclosed a check for \$300 to cover this amendment. Any questions regarding this amendment may be directed to Philip N. Theurer at 804-329-9081.

Yours truly,
Molins Richmond, Inc.
