Nuclear Regulatory Commission
John E. Glenn, Ph.D.
Nuclear Materials and Safeguards Branch
631 Park Avenue
King of Prussia, Pa. 19406

Dear Doctor Glenn:

Enclosed please find my completed application for a Nuclear Regulatory Commission license for the use of byproduct material for human diagnostic nuclear testing. I am a board certified nuclear cardiologist, having completed both cardiology and nuclear medicine fellowships at Yale University, following my Internal Medicine training.

This facility will be located in a free standing outpatient imaging clinic. I will utilize Doctor Robert C. Lange, Chief Physicist in Nuclear Medicine at Yale University as a consultant. I will also be utilizing Doctor John Creatura at Bridgeport Hospital as a backup resource should I be on vacation or unavailable. →

I hope that you find this application complete and fulfilling all requirements. If I can augment any items or assist you in any way in expediting this application, I would greatly appreciate it. Please call me at your convenience.

Thank you

Sincerely,

J. Meizlish
Jay L. Meizlish, M.D., F.A.C.C.
