JUN 19 1984

Was not sent on 6/25

MEMORANDUM FOR: Isa Yin, Region III

FROM: Richard H. Vollmer, Director
Division of Engineering
Office of Nuclear Reactor Regulation

SUBJECT: DIABLO CANYON

The following activities on your part will complete the NRR-Region V request for your assistance in the review of allegations for the Diablo Canyon Nuclear Power Plant. Your cooperation and contributions to date are appreciated.

- (1) A review of the IDVP piping activities to address your comments of April 24, 1984 is scheduled for June 18-22, 1984 at the offices of R. L. Cloud Associates in Oakland, CA. You should plan to participate as an active member of the review group performing this evaluation.
- (2) Your inspection report should be completed reflecting your observations and conclusions. Since PG&E has decided to terminate the responsibilities and activities of the OPEG group at the Diablo Canyon site, many of the programmatic issues you raised, and which have been confirmed, related to OPEG activities may be mooted. The review group will meet with PG&E on June 29 to discuss these programmatic issues, the extent to which the abolishment of OPEG will moot these concerns, and the steps to assure that an acceptable transition of activities takes place. The review group will recommend actions and/or license conditions if appropriate to assure full resolution of these issues. Region V will follow up on these actions and license conditions. You should plan to participate in the June 29 meeting with PG&E in Bethesda.
- (3) The SSER developed by each of the seven task groups of the review group assigned to review implementation of the low power licensing conditions related to piping and piping supports will be forwarded to you for review. Your written comments should be sent to the appropriate task team leader with copies to R. Vollmer, J. P. Knight, and H. Schierling. Any written comments you may wish to contribute will be included verbatim as part of our SSER.

You will be kept informed of all meetings relevant to the issues you have raised and will be sent copies of any documents prepared by PG&E and the staff on these issues.

Richard H. Vollmer, Director
Division of Engineering
Office of Nuclear Reactor Regulation

APPROVED:

Harold R. Denton, Director
Office of Nuclear Reactor Regulation

John B. Martin, Regional Administrator
Region V
