Re: License #34-16429-02  
Amendment Request

Gentlemen:

June 5, 1986

Enclosed please find NRC forms and fee to amend our existing License #34-16429-02. We wish to amend our License to reflect personnel changes and the addition of another AECL Gammacell 220 to this facility.

The new Gammacell will be placed in proximity to our existing Gammacell. It is being transferred from RCA, West Palm Beach, Florida and is now licensed under Florida Radiation Control License #1676-1. We have been advised it will arrive at this location near the end of July, 1986.

All existing radiation protection programs and standards as mentioned in our license for our Gammacell will be placed into effect when the additional Gammacell arrives.

Should you have any questions and/or comments, please advise.

Sincerely,

W. L. Mertz  
Safety Administrator
