P.O. Box 5119
Akron, Ohio 44313

Dear Mr. Klapp:

This is in reference to your application, dated August 25, 1986 for a Byproduct Material License. In order to continue our review, we need the following additional information:

1. Please note that Kay Ray 4800 X series gauges are not listed in the NRC's Sealed Source and Device Registry under that name. Before a device can be listed on your license we must determine that it has been approved by the NRC. Therefore, please check to be sure this is the correct model number for the source holder. If possible provide the NRC Registry No. for the device you want.

2. State that you will prepare lock-out procedures, that they will be provided to personnel and that the procedures will be posted.

3. Specify who will be responsible for ensuring that the lock-out procedures are followed.

If you have any questions or require clarification on any of the information stated above, you may contact us at 312-790-5625.

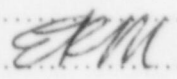

We will continue our review of your application upon receipt of this information. Please reply in duplicate, within 30 days, and refer to Control Number 82020.
