Docket No. 40-8910

SUA-1478, Termination

04008910100E

MEMORANDUM FOR: Docket File No. 40-8910

FROM: Thomas T. Olsen, Project Manager  
Licensing Branch 1  
Uranium Recovery Field Office, Region IV

SUBJECT: REQUEST BY MOBIL OIL CORPORATION TO TERMINATE SOURCE  
MATERIAL LICENSE SUA-1478: MONUMENT IN SITU TEST  
PROJECT, SECTION 28

By letter dated November 26, 1986, Mobil Oil Corporation requested termination of Source Material License SUA-1478. A review was completed by URFO personnel on January 6, 1987. Mobil Oil Corporation submitted a report dated December 18, 1986, describing the operational status of the site.

The company had never initiated any uranium leaching and processing activities at the site. Therefore, no by-product material was ever generated. At this time, well plugging is not required by the State of New Mexico regulations. This was confirmed in a telephone conversation with the Environmental Improvement Division (EID), Santa Fe, New Mexico, on January 7, 1987. The EID will continue to monitor the site status with respect to State of New Mexico regulations.
