SUBJECT: Beaver Valley Power Station Unit No. 2
Docket No. 50-412
Final Safety Analysis Report - Amendment 17

REFERENCE: DLC Letter dated April 7, 1987, Mr. J. D. Sieber to U. S. Nuclear
Regulatory Commission

Gentlemen:

Duquesne Light Company, acting on its own behalf and as agent for The Cleveland Electric Illuminating Company, Ohio Edison Company, and The Toledo Edison Company, is filing herewith three (3) signed originals plus sixty (60) copies of Amendment 17 to the Final Safety Analysis Report (FSAR) for the Beaver Valley Power Station Unit No. 2 (BVPS-2).

Based on guidance provided in Generic Letter 86-10, this amendment includes the provisions of the BVPS-2 Fire Protection Program which normally would have been part of the BVPS-2 Technical Specifications. These provisions have been incorporated into FSAR Section 9.5.1. The provisions for testing and inspection of the fire protection system have been incorporated into the FSAR by reference to Site Administrative Procedure 9D, "Fire Protection". This procedure was submitted to the NRC under the BVPS-1 docket (Docket No. 50-334) in the above-noted reference.

Attachment #1 provides a brief description of FSAR changes in this amendment which we believe could impact the staff's Safety Evaluation Report.
