

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER  
VICE PRESIDENT - NUCLEAR

September 10, 1986

Mr. E. H. Johnson, Director  
Division of Reactor Safety and Projects  
U. S. Nuclear Regulatory Commission  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

KMLNRC 86-166  
Re: Docket No. STN 50-482  
Ref: KMLNRC 86-136 dated 7/31/86, from GLKoester, KG&E,  
to EHJohnson, NRC  
Subj: Request for Additional Information Concerning  
Violation 50-482/8613-02

Dear Mr. Johnson:

The purpose of this letter is to provide additional information to that submitted in Reference 1, concerning the corrective action taken in response to Violation 482/8613-02. The violation has been placed in the electrical and mechanical maintenance required reading program, (Required Reading Number 86-36), to ensure maintenance personnel are cognizant of the importance of following procedures and properly documenting the required information. This action will reduce the possibility of future similar occurrences.

Although maintenance personnel did not properly document the required information, KG&E does not believe that this single occurrence warrants a violation. As stated in Reference 1 the work request program requires a final review of work requests to ensure that the appropriate information is included on work requests prior to sending them to the vault. Due to the fact that this was an isolated occurrence and the program in place would have found this omission, KG&E feels that this would better be classified as a deviation rather than a violation.

If you have any questions concerning this matter, please contact me or Mr. O. L. Maynard of my staff.

Yours very truly,

8609220049 860910
