

JUN 12 1992

Dr. Dietrich K. Gehmlich  
Reactor Administrator  
University of Utah  
Salt Lake City, Utah 84112

Gentlemen:

SUBJECT: INTERIM INITIAL EXAMINATION REPORT NO. 50-407/UL-91-01

On December 9, 1991, the NRC administered initial examinations to employees of your facility who had applied for a license to operate your University of Utah Reactor Facility. The evaluation was conducted in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 6. At the conclusion of the examination, the examination questions and preliminary findings were discussed with those members of your staff identified in the enclosed report.

Due to problems identified during the grading of the written examination, a management meeting was held to discuss the examination results and to review your operator licensing training program. The participants, findings and proposed resolutions discussed during this meeting are identified in an enclosed report (Enclosure 2).

As a result of this meeting it was our understanding that you intended to accomplish several short term and long term corrective actions, described in Enclosure 2. If our understanding of any of these short and long term actions is incorrect, please contact me within seven days of receipt of this letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the Public Document Room.

Should you have any questions concerning this examination, please contact me at (301) 504-1031.

Sincerely,

Robert M. Gallo, Chief  
Operator Licensing Branch  
Division of Licensee Performance  
and Quality Evaluation, NRR
