RECEIVED

Dear Mr. Nussbaumer:

My partners and I are selling the Marion Mill, which is treating Uranium by-products material under License #SUA-724.

We are retaining the Uranium by-products on hand, which amount to approximately 525 bbls., or about 215 ton. This will continue to be stored at the mill until it can be disposed of.

The mill will continue to operate exactly as set forth in my application for our present license.

Would you please consider this an application for a license for the new owner, Lenway Mining and Development Corporation, 1061 Grant Place, Boulder, Colorado.

This is a wholly owned subsidiary of Fred H. Lenway and Company, Inc., 100 California Street, San Francisco 11, California. Lenway Mining and Development Corporation is a Colorado Corporation. The officers are Fred H. Lenway, President; M. J. Nelson, Vice-President; (the addresses of both are 100 California Street, San Francisco, California) Earl G. Sweeney, Vice-President and General Manager, address 1061 Grant, Boulder, Colorado.

At the suggestion of Mr. Eber R. Price, Director, Division of State and Licensee Relations, I have made the mill storage section a restricted area by erecting a chain link fence, and by putting a gate across our entrance driveway. I have also labeled the barrels containing the Uranium by-products material "Caution--Radioactive Material." I have ordered additional radiation warning signs to be put up around the premises.
