Dear Mr. Potter:

Please find enclosed our application for amendment to NRC License No. 47-16781-01. This amendment is requested to cover the use of an additional KEVEX energy dispersive X-ray analyzer. The analyzer is used to separate various alloys during recycling operations. The use of the analyzer is very important to the elimination of errors in chemical compositions of our various products. We would appreciate your quick response to this request. Our application fee of \$40.00 is enclosed.

If you have any questions on the application, please contact me.

Sincerely,

Ronald J. Simonton, CIH, CSP, CHCM
Plant Industrial Hygienist
